DERMAUTOLOGY DILUYENTE DIFUMINADOS Código: DA180/1 AUTO LOGY **SECTION 7 : HANDLING AND STORAGE** PRECAUTIONS FOR SAFE HANDLING: 7.1 Comply with the existing legislation on health and safety at work. General recommendations Avoid any type of leakage or escape. Keep the container tightly closed. Recommendations for the prevention of fire and explosion ris Vapours are heavier than air, may spread along floors to a considerable distance, can form explosive mixtures with air and are able to reach distant ignition sources and flame up or explode. Due to its flammability, this material should only be used in areas from which all naked lights and other sources of ignition have been excluded and away from other heat or electrical sources. Switch mobile phones off and do not smoke. If this product is used in an industrial installation, the zones with risc of explosion should be marked. Use instruments, systems and protective equipment adequate to the classification of zones, according to the health and safety at work laws, in accordance with Directive 2016/34/EU and 99/92/EC. Electrical equipment should be protected to the appropriate standard. No tools with a potential for sparks should be used. Floors should be electrically conductive and operators should wear anti-static footwear and clothing. Elaborate the document 'Protection against explosions'. **Flash point** Autoignition temperature Lower/upper flammability or explosive limits % Volume 25°C Ventilation requirement m3/l Air/Preparation to keep below 1/10 of the Lower Explosive Limit. Recommendations for the prevention of toxicological risks: Do not eat, drink or smoke while handling. After handling, wash hands with soap and water. For exposure controls and personal protection measures, see section 8. Recommendations for the prevention of environmental contamination: Avoid any spillage in the environment. Pay special attention to the cleaning water. In the case of accidental spillage, follow the instructions indicated in section 6. 7.2 CONDITIONS FOR SAFE STORAGE, INCLUDING ANY INCOMPATIBILITIES: Forbid the entry to unauthorized persons. Keep out of reach of children. This product should be stored isolated from heat and electrical sources. Do not smoke in storage area. If possible, avoid direct contact with sunlight. Avoid extreme humidity conditions. In order to avoid leakages, the containers, after use, should be closed carefully and placed in a vertical position. For more information, see section 10. **Class of storage** According to current legislation. min: 5. °C, max: 40. °C (recommended). Temperature interval Incompatible materials Keep away from oxidizing agents, acids, a kalis, metals, peroxides. Type of packaging: According to current legislation. Limit quantity (Seveso III): Directive 2012/18/EU: - Named dangerous substances/mixtures: None - Hazard categories and lower-/upperthreshold quantities in tonnes (t): · Physical hazards: Flammable liquid and vapour (P5c) (5000t/50000t). · Health hazards: Not applicable · Environmental hazards: Not applicable · Other hazards: Not applicable. - Threshold quantity for the application of lower-tier requirements: 5000 tons - Threshold quantity for the application of upper-tier requirements: 50000 tons - Remarks: The qualifying quantities set out above relate to each establishment. The quantities to be considered for the application of the relevant Articles are the maximum quantities which are present or are likely to be present at any one time. Dangerous substances present at an establishment only in quantities equal to or less than 2 % of the relevant qualifying quantity shall be ignored for the purposes of calculating the total quantity present, if their location within an establishment is such that it cannot act as an initiator of a major accident elsewhere at that establishment. For more details, see note 4 of Annex I of the Seveso Directive. 7.3 SPECIFIC END USES: For the use of this product particular recommendations apart from that already indicated are not available.

DERMAUTOLOGY DILUYENTE DIFUMINADOS Código: DA180/1

SECTION 8 : EXPOSURE CONTROLS/PERSONAL PROTECTION

8.1 CONTROL PARAMETERS:

AUTO LOGY

If a product contains ingredients with exposure limits, may be necessary a personnel monitoring, work place or biological, to determine the effectiveness of the ventilation or other control measures and/or the necessity to use respiratory protective equipment. Reference should be made to EN689, EN14042 and EN482 standard concerning methods for assessing the exposure by inhalation to chemical agents, and exposure to chemical and biological agents. Reference should be also made to national guidance documents for methods for the determination of dangerous substances.

OCCUPATIONAL EXPOSURE LIMIT VALUES (TLV)

AGCIH 2020	Year	TLV-TWA		TLV-STEL		Remarks	
n-butyl acetate	2015	ppm 50.	mg/m3 237.	ppm 150.	mg/m3 713.		
Xylene	1996	100.	434.	150.	651.	A4,BEI	
2-methoxy-1-methylethylaœtate		50.	275.	100.	550.	Recommended Skin	
Hydrocarbons C9 aromatics		50.	290.	-	-	Recommended	
Butylglycol acetate	2000	20.	133.	-	-	A3	

TLV - Threshold Limit Value, TWA - Time Weighted Average, STEL - Short Term Exposure Limit.

Skin - Danger of cutaneous absorption.

A3 - Carcinogenic in animals.

A4 - Non classified as carcinogenic in humans.

BEI - Biological exposure index (biological monitoring).

Dermal (Vd): Means that, in exposures to this substance, the contribution by the cutaneous route, including the mucous membranes and eyes, may result significant for the overall body content if no measures are taken to prevent absorption. There are some chemicals for which dermal absorption, both in liquid and vapour phases, can be very high, and this route of entry may be or equal or greater importance even that inhalation pathway. In these situations, the use of a biological control is essential in order to quantify the overall amount of contaminant absorbed.

BIOLOGICAL LIMIT VALUES:

Biological monitoring can be a very useful complementary technique to air monitoring when air sampling techniques alone may not give a reliable indication of exposure. Biological monitoring is the measurement and assessment of hazardous substances or their metabolites in tissues, secretions, excreta or expired air, or any combination of these, in exposed workers. Measurements reflect absorption of a substance by all routes. Biological monitoring may be particularly useful in circumstances where there is likely to be significant skin absorption and/or gastrointestinal tract uptake following ingestion, where control of exposure depends on respiratory protective equipment, where there is a reasonably well-defined relationship between biological monitoring and effect, or where it gives information on accumulated dose and target organ body burden which is related to toxicity.

This preparation contains the following substances that have established a biological limit value:

 \cdot Xylenes (technical or commercial grade) (2011): Biological determinant: methylhippuric acids in urine, BEI: 1.5 g/g creatinine, Sampling time: end of shift (2).

(2) When the end of the exposition not coincide with the end of the working day, the sample will be taken as soon as possible after the real exposition ceases.

DERIVED NO-EFFECT LEVEL (DNEL):

Derived no-effect level (DNEL) is a level of exposure that is considered safe, derived from toxicity data according to specific guidances included in REACH. DNEL values may differ from a occupational exposure limit (OEL) for the same chemical. OEL values may come recommended by a particular company, a government regulatory agency or an organization of experts. Although considered protective of health, the OEL values are derived by a process different of REACH.

CMR EFFECTS:

I

<u>Carcinogenic effects:</u> It is not considered as a carcinogenic product.

Genotoxicity: It is not considered as a mutagenic product.

Toxicity for reproduction: Does not harm fertility. Does not harm the unborn child.

Effects via lactation: Not classified as a hazardous product for children breast-fed.

DELAYED AND IMMEDIATE EFFECTS AS WELL AS CHRONIC EFFECTS FROM SHORT AND LONG-TERM EXPOSURE:

Routes of exposure: May be absorbed by inhalation of vapour, through the skin and by ingestion.

Short-term exposure: Exposure to solvent vapour concentrations in excess of the state d occupational exposure limit, may result in adverse health effects, such as mucous membrane and respiratory system irritation and adverse effects on kidneys, liver and central nervous system. Liquid splashes in the eyes may cause irritation and reversible damage. Very small amounts aspirated by the lungs may cause severe pulmonary damage, including death. If swallowed, may cause irritation of the throat and other effects may be the same as described in the exposure to vapours.

Long-term or repeated exposure: Repeated or prolonged contact may cause removal of natural fat from the skin, resulting in non-allergic contact dermatitis and absorption through the skin. Repeated exposure may cause skin dryness or cracking.

INTERACTIVE EFFECTS:

Not available.

INFORMATION ABOUT TOXICOCINETICS, METABOLISM AND DISTRIBUTION: Dermal absorption:

This preparation contains the following substances for which dermal absorption can be very high: 2-methoxy-1-methylethyl acetate. Basic toxicokinetics: Not available.

In accordance with Regulation (EC) No. 1907/2006 and Regulation (EU) No. 2015/830

DERMAUTOLOGY DILUYENTE DIFUMINADOS Código: DA180/1 * AUTO ADDITIONAL INFORMATION: This preparation contains glycols that are readily absorbed through the skin and may cause harmful effects on the blood. **SECTION 12 : ECOLOGICAL INFORMATION** No experimental ecotoxicological data on the preparation as such is available. The ecotoxicological classification for the se mixture has been carried out by using the conventional calculation method of the Regulation (EU)No. 1272/2008~2020/1182 (CLP). 12.1 TOXICITY: Acute toxicity in aquatic environment LC50 (OECD 203) EC50 (OECD 202) <u>EC50</u> (OECD 201) for individual ingredients : mg/l·48hours mg/I.96hours mg/I.72hours n-butyl acetate > 18. Fishes > 44. Daphnia 675. Algae Xylene (mixture of isomers) > 13. **Fishes** > 16. Daphnia > 10. Algae 2-methoxy-1-methylethylacetate 134 Fishes 408. Daphnia 1000. Algae Hydrocarbons C9 aromatics > 9.2 Fishes > 3.2 Daphnia > 2.9 Algae Daphnia Butylglycol acetate 37. > 28. Fishes > 1570. Algae No observed effect concentration NOEC (OECD 210) <u>NOEC</u> (OECD 211) <u>NOEC</u> (OECD 201) mg/l·21days 23. mg/I·28days mg/I·72hours n-butyl acetate Daphnia 2-methoxy-1-methylethylacetate > 100. Daphnia Lowest observed effect concentration Not available ASSESSMENT OF AQUATIC TOXICITY: Aquatic toxicity Cat. Main hazards to the aquatic environment Criteria Acute aquatic toxicity: Not classified as a hazardous product with acute toxicity GHS/CLP Not classified to aquatic life (based on available data, the classification 4.1.3.5.5.3. criteria are not met). Chronic aquatic toxicity: Cat.3 HARMFUL: Harmful to aquatic life with long lasting GHS/CLP effects. 4.1.3.5.5.4. CLP 4.1.3.5.5.3: Classification of a mixture for acute hazards, based on summation of dassified components. CLP 4.1.3.5.5.4: Classification of a mixture for chronic (long term) hazards, based on summation of classified components. 12.2 PERSISTENCE AND DEGRADABILITY: Not available. Aerobic biodegradation DQO %DBO/DQO Biodegradability mgO2/g for individual ingredients : 5 days 14 days 28 days n-butyl acetate 2204. ~ 80. ~ 82. ~ 83. Easy 2620. ~ 52. ~ 88. Xylene (mixture of isomers) ~ 81. Easy 2-methoxy-1-methylethyla æt ate 1520. ~ 22. ~ 78. ~ 90. Easy Hydrocarbons C9 aromatics 3195. Easy Butylglycol acetate 2071. ~ 51. ~ 71. ~ 88. Easy Note: Biodegradability data correspond to an average of data from various biblio graphic sources. 12.3 BIOACCUMULATIVE POTENTIAL: # May bioaccumulate. Potential **Bioaccumulation** log Pow BCF L/kg for individual ingredients : n-butyl acetate 1.81 6.9 (calculated) Not bioaccumulative. (calculated) Xylene (mixture of isomers) 3.16 56. Low 0.560 Not bioaccumulative. 2-methoxy-1-methylethyla æt ate 3.2 (calculated) 70. Hydrocarbons C9 aromatics 3.30 (calculated) Low Butylglycol acetate 1.515.1(calculated) Not bioaccumulative. MOBILITY IN SOIL: 12.4 Not available. Constant of Henry Potential Mobility log Poc for individual ingredients : Pa·m3/mol 20°C 28. (calculated) n-butyl acetate 1.84 Not bioaccumulative. Xylene (mixture of isomers) 2.25 660. (calculated) Low 2-methoxy-1-methylethyla cetate 0.230 0.42 (calculated) Not bioaccumulative. Hydrocarbons C9 aromatics 2.96 440. (calculated) Low Not bioaccumulative. Butylglycol acetate 1.41 0.32 (calculated)

In accorda	nce with Regulation (EC) No. 1907/2006 a	nd Regulation (EU) No. 2015/830				
	RMAUTOLOGY DILUYENTE DIFUMINADOS digo: DA180/1					
	RESULTS OF PBT AND VPVB ASSESMENT: Does not contain substances that fulfil the	Annex XIII of Regulation (EC) no. 1907/2006: PBT/vPvB criteria.				
	OTHER ADVERSE EFFECTS: Ozone depletion potential: Not available. Photochemical ozone creation potential: Not available. Earth global warming potential: In case of fire or incineration liberates CO2. Endocrine disrupting potential: Not available.					
SECTION 13 : DISPOSAL CONSIDERATIONS						
- ; ; []	 Take all necessary measures to prevent the production of waste whenever possible. Analyse possible methods for revaluation or recycling. Do not discharge into drains or the environment, dispose at an authorised waste collection point. Waste should be handled and disposed in accordance with current local and national regulations. For exposure controls and personal protection measures, see section 8. <u>Disposal of empty containers:</u> Directive 94/62/EC~2015/720/EU, Decision 2000/532/EC~2014/955/EU: Emptied containers and packaging should be disposed in accordance with currently local and national regulations. The classification of packaging as hazardous waste will depend on the degree of empting of the same, being the holder of the residue responsible for their classification, in accordance with Chapter 15 01 of Decision 2000/532/EC, and forwarding to the appropriate final destination. With contaminated containers and packaging, adopt the same measures as for the product in itself. Procedures for neutralising or destroying the product: 					
(F						
(Controlled incineration in special facilities for chemical waste, in accordance with local regulations.

	<u>Transport by inland waterways (ADN):</u> Not available.					
	PACKING GROUP: See section 14.3					
	ENVIRONMENTALH AZARDS: Not applicable.					
1	<u>SPECIAL PRECAUTIONS FOR USER:</u> Ensure that persons transporting the product know what to do in case of accident or spill. Always transport in closed containers that are upright and secure. Ensure adequate ventilation.					
	TRANSPORT IN BULK ACCORDING TO AN NEX II OF MARPOL 73/78 AND THE IBC CODE: Not available.					
SECTIO	N 15 : REGULATORY INFORMATION					
15.1 <u>E</u>	EU SAFETY, HEALTH AND ENVIRONMENTAL REGULATIONS/LEGISLATION SPECIFIC: The regulations applicable to this product generally are listed throughout this Safety Data Sheet. Restrictions on manufacture, placing on market and use: See section 1.2 Tactile warning of danger: Not applicable (product for professional or industrial use).					

Γ

	DERMAUTOLOGY DILUYENTE DIFUMINADOS Sódigo: DA180/1				
	Child safety protection: Not applicable (product for professional or industrial use).				
	OTHER REGULATIONS:				
	Control of the risks inherent in major accidents (Seveso III): See section 7.2				
	Other local legislations: The receiver should verify the possible existence of local regulations applicable to the chemical.				
15.2	CHEMICAL SAFETY ASSESSMENT: A chemical safety assessment has not been carried out for this mixture.				
SECTION 16 : OTHER INFORMATION					
	TEXT OF THE PHRASES AND NOTES REFERENCED IN SECTIONS 2 AND/OR 3: Hazard statements according the Regulation (EU) No. 1272/2008~2020/1182 (CLP), Annex III: H226 Flammable liquid and vapour: H302 Harmful if swallo wed. H304 Ma ybe fatal if swallowed and enters airways. H312 Harmful contact with skin. H315 Causes skin irritation. H319 Causes serious eye irritation. H332 Harmful if inhaled. H335 May cause respira irritation. H336 May cause drowsiness or dizziness. H411 Toxic to aquatic life with long lasting effects. EUH066 Repeated exposure cause skin dryness or cracking. H373i May cause damage to organs through prolonged or repeated exposure if inhaled.	atory			
	EVALUATION OF THE INFORMATION ON THE DANGER OF MIXTURES: See sections 9.1, 11.1 and 12.1.				
	ADVICES ON ANY TRAINING APPROPRIATE FOR WORKERS: It is recommended for all staff that will handle this product to carry out a basic training in occupational risk and prevention, in order provide understanding and interpretation of Safety Data Sheets and labelling of products as well.	rto
