

ACRY-PUR 902-G

Highest quality finish

Product specifications:

- 2K Acrylic-Polyurethane Topcoat.
- Recommended for all types of vehicles where highest quality is a must.
- Highest UV and weather resistance.
- It can be used as clearcoat, without pigment bases, applying it on basecoat.

Perfect finish:

- Excellent Gloss level with over 92%.
- More than 20.000 colours available thanks to the Disolac tintometric system.
- Is compatible with all the DISOLAC additives.

This system guarantees a high anticorrosive protection with 480h in salt spray test and 1440h inside the humidity chamber with the following process (c5-medium):

PRIMAPOX 6041 + ACRY-PUR 902-G.

Resistance and durability

It offers chemical resistance with the following products: gasoil, motor oil, sulphuric acid, hydrochloric acid, sodium hydroxide, etc.

Furthermore, it has good results on mechanical resistance with the following tests: impact, mandrel bend test, etc.

Thanks to its chemical composition and its acrylic-polyurethane resins, we can ensure a good UV protection.
